Edited by MILTON ORKIN, M.D.
HOWARD I. MAIBACH, M.D.
LAWRENCE C. PARISH, M.D.
ROBERT M. SCHWARTZMANN, D.V.M., M.P.H.

Based on the proceedings of the recent International Conference on Scabies, this book is virtually the only up-to-date and authoritative work existing on this subject.

You'll find the latest scientific and clinical information in pages on the natural history and biology of the parasite which causes scabies, the immunology and infectious complications of scabies, the diagnosis and treatment of scabies, the control of epidemics of the disease, the epidemiology and treatment of pediculosis.

In addition, a section on dermatoses due to other arthropods is included.

Many full color illustrations enhance the text.
